Company announcement no. 3

Adequate own funds and the internal capital adequacy requirement

Pursuant to the executive order on calculation of risk exposure, total capital and solvency need, Danish Ship Finance must publish its adequate own funds on a quarterly basis.

The calculation is made on the basis of the 8+ approach and the Danish FSA's "Guidelines on Adequate Capital Base and Solvency Needs for Credit Institutions".

The guidelines issued by the FSA contain benchmarks for stress tests etc. These benchmarks define the limits within which the FSA assesses the institution's risks as being covered by 8 per cent of the total risk exposure. If these limits are exceeded, the institution is required to increase its adequate own funds.

The solvency calculation is presented for the Group and the subsidiary (referred to as solo).

Adequate own funds at 31 December 2020

DKKm / %	Group	Solo
Total weighted items	41,453	41,042
Pillar I requirement (8 per cent of total risk exposure amount)	3,316	3,283
